

"Love your enemies. Do good to those who hate you." Luke 6:27

This verse challenges us to love people no matter what they say or do. It may be hard to do that, especially towards people who have hurt us.

3 - 6

- On a piece of paper, draw 3 big hearts.
- In the first heart, write / draw someone whom you love.
 - In the second heart, write / draw someone who loves you.
 - Now, in the third heart, draw a sad face to show the times we are hurt or sad. In those times, we should still love others! Let's show love by colouring over the sad face with a red colour pencil or crayon.

7 - 12

Is there someone in your life who is just really hard to love? This person has not been kind to you or has made fun of you. He/she may have hurt you with unkind words.

But Jesus wants us to love everyone, even our enemies. It sounds crazy, but He tells us to do good to them!

With this person in mind, write down at least 2 good things that you could do for him/her. It could be finding something about this person that you like and giving him/her a compliment. Or simply sharing your snack with him/her.

Remember, Jesus wants you to love people no matter what. Ask Jesus for the strength and courage to do that.

Dear God, thank You for loving me no matter what. I want to do the same for my friends and family. Please help me and give me strength. In Jesus' name, Amen.

Parents, use the topic below to start a God-conversation with your children.

Talk about a time when you did something good to someone who is hard to love.

HOMEMADE LAVA LAMP

MATERIALS NEEDED:

 Clear bottle with a lid / cap (either plastic or glass)

 Cooking oil

 White vinegar

 Food colouring

 Baking Soda

 Cloth or rag

STEP
01

Fill the bottle with white vinegar till 1/4 full.

STEP
02

Then, fill the bottle with cooking oil till 3/4 full.

STEP
03

Drop 1-2 drops of food colouring into the mixture. DO NOT shake the bottle.

STEP
04

Add a very tiny portion of baking soda into the mixture. (About the size of 2-4 sesame seeds).

STEP
05

Cap the bottle and look out for the "lava lamp effect" when the baking soda reacts with the vinegar.

STEP
06

Place a handphone light under the bottle and watch it glow!
